Dear Ms. Johnston:

In response to your Freedom of Information Act request, I have reviewed the contents of our files regarding the K. J. Quinn Company, Folly Mill Road, Seabrook, NH. The facility is listed as a potential source of contamination in our CERCLIS inventory. A Preliminary Assessment was completed for the facility in 1980 and recommended that any additional efforts be given a low priority. We have very little information on this facility other than some contaminants have been detected in monitoring wells.

Our inventory does not show any other facilities being located in Seabrook, NH.

If I can be of any further assistance, please contact me at (617) 565-3659.

Sincerely,

Donald R. Smith  
Environmental Engineer
